Subject: RE: Eng Analysis

Joe, I called the engineer the day after we ended our meeting at nearly 6pm on 3/10/05.
He said he needed a little time for some engineering analysis, and I'll check this week on his progress. SAL

Joe, this engineering analysis takes a little time...will let you know as soon as I get some information.
I will call him again this week to check.
Thanks for your patience. SAL

Sam,
We still haven't heard from the engineer?

Thanks,
Joe Trevino Jr.

Sam,
How long will it be until you find something out from the engineers?

Joe

Joe, this note is a follow-up to our meeting last week.

First, hope you called the City for Refuse Service information. If not,
feel free to call Silvia Ramos at 933-5800.

Second, I have contacted an engineer to evaluate the feasibility of Dog
Ridge Water Supply Corporation releasing your subdivision so the city could
serve you with water. This will be an engineering issue, based on relative
grades and water distribution systems. When he gives me some input, I will
share it with you.

If I can provide any additional information, let me know. SAL
